

GREEN SOLUTIONS AWARDS: HOW TO VOTE

The Green Solutions Awards provide concrete climate solutions, illustrating the discourses conducted since COP21 in Paris.

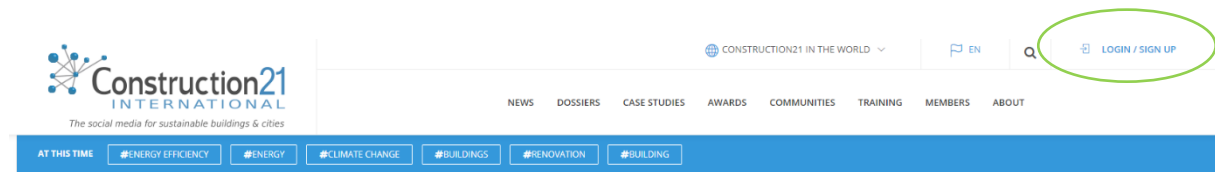

While juries of experts are organised in each country covered by the Construction21 network + for candidates of the international platform, the competition organiser is launching a parallel vote by Internet users. Professionals are invited to vote online from April 1st to May 31st 2021 on Construction21: the building, district and infrastructure that win the most votes in its country and on the international platform will win the Users' Choice Award.

1. LOG IN ON CONSTRUCTION21

- ❖ To vote, you need to have a Construction21 account and to log in
- ❖ Go to the platform of your choice by selecting it from the list at the top of your screen

- ❖ Click on "Login/Register" or "LOGIN" at the top right of the screen

→ **No account yet?** Follow the tutorial instructions "[Register on Construction21](#)"

 To vote for the national projects published on the different platforms, set up your profile to access the Construction21 platform of the country concerned → Go to your profile > profile > at the bottom of the page:

My platform(s)

2. MOVE YOUR MOUSE OVER THE "AWARDS" MENU

- In the Awards tab, click on "Candidates"

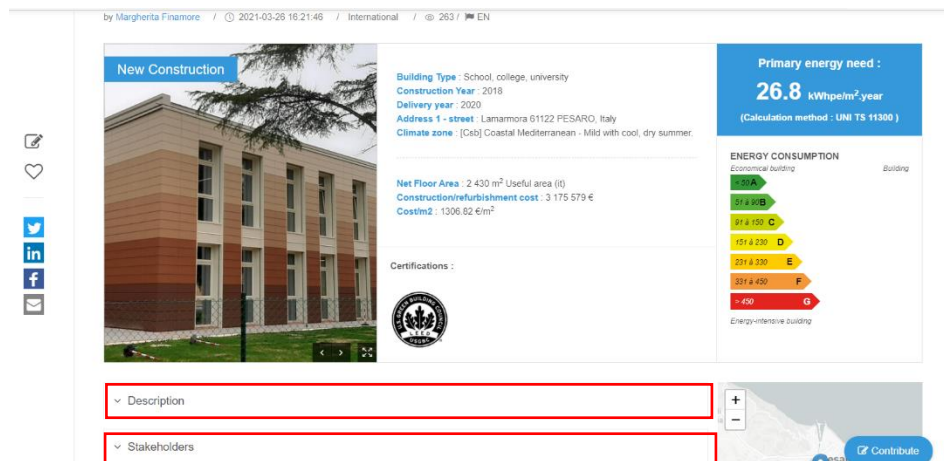

To explore the different categories, click on Buildings/ Cities / Infrastructures

3. DISCOVER BUILDINGS, DISTRICTS, INFRASTRUCTURES IN COMPETITION

- Click on the name or on the blue icon (eye) to see the full description of the case study of your choice
- Browse the different tabs: description / stakeholders / energy or the solutions associated with these projects

4. VOTE FOR YOUR FAVOURITE BUILDINGS/ DISTRICTS/ INFRASTRUCTURES

- Just "like" by clicking on the "thumbs up" icon from the page with all candidates

Oficinas Santa Catarina (FINSAs offices)

- Office building < 28m
- Parque FINSAs Santa Catarina 64000 Nuevo León, Mexico

Indospace Industrial Park Vallam

- Factories
- Vallam Village, Sriperumbudur Taluk,Kancheepuram District. 600000 Chennai, India

- Or by clicking on the "thumbs up" button from the page of the selected case study

The new FINSAs offices are situated within the FINSAs Industrial Park of Santa Catarina, which is strategically located in northern Mexico with easy access to central Mexico and Texas. The industrial park serves a variety of industries with tenants that range from automotive to logistic companies. The office provides a resource-efficient work space for FINSAs, one of Mexico's leading industrial real estate companies. The two-story office building has meeting rooms, an on-site warehouse and recreational spaces for staff to gather.

The operational costs of the office building are expected to decrease by more than one-third because of its green measures that were implemented at no additional cost to FINSAs. Features such as an energy-efficient air conditioning system and occupancy sensors reduce the use of energy while low-flow faucets conserve water. The use of construction materials such as precast concrete panels for the external walls also reduce the embodied energy in materials.

FINSAs is committed to building industrial spaces that use resources more efficiently with minimal impact on the environment. They believe that building green also positively impacts the lives of those who work within the building. Oficinas Santa Catarina is the first EDGE-certified project by FINSAs, but the company hopes that it will be a model for future offices. Oficinas Santa Catarina has received final EDGE certification from GBCI.
