

Green Solutions Awards 2020-21: Discover the selection of all countries

IN SHORT

The different chapters of the Construction21 network are gradually revealing their winners. After France, the international, Belgian, German, and Spanish platforms are unveiling their winners; the other countries will follow in July.

Discover these projects that have been chosen locally by the juries of experts and by professionals via online voting. They will give you an insight into the best practices from all over the world. You will also find out which of these buildings, districts and infrastructures qualify for the international final!

An observatory of sustainable construction around the world

The Green Solutions Awards are an **effective tool for identifying** exemplary projects, **selecting** the best of them and **showcasing** them to as many professionals as possible, with the aim of accelerating the ecological and energy transition of the construction industry. With both national and international visibility.

The 2020-21 edition has brought out 192 projects from all over the world, which have been analysed by professionals and different juries of experts. **The selected projects respect this geographical variety, with winners located in Turkey, Switzerland, Benin, Russia, the United Kingdom, etc.** not to mention the **usual countries such as Morocco, Germany, China, Luxembourg, etc.**

The partners of the competition

A big thank you is due here for our sponsors, which are companies actively engaged in the fight against climate change, and who support the organisation of the competition:

European leader in real estate services, BNP Paribas Real Estate covers the entire life cycle of a property: Promotion, Transaction, Expertise, Property Management, and Investment Management.

With 5,400 employees, BNP Paribas Real Estate locally advises owners, tenants, investors and local authorities in Europe, the Middle East and Asia. BNP Paribas Real Estate, the real estate subsidiary of the BNP Paribas Group, generated €1.01 billion in revenues in 2019.

At BNP Paribas Real Estate, the climate change topic and its impact on the real estate business is part of our Corporate Social Responsibility (CSR) strategy. In fact, in our operations and service offers, we are committed in taking into account the climate change challenges, optimizing the environmental footprint of our activities, promoting circular economy and making the environmental quality of our products and services a lever to increase performance both in finance and in use.

That is why, whether in construction, operation or renovation, we offer our customers energy-efficient and environmentally friendly solutions, respectful of the health and well-being of corporate as well as residential real estate users.

[2 questions to Catherine Papillon, Global Head of Sustainable Development & CSR at BNP Paribas Real Estate](#)

A major international group in the construction engineering and mobility services sectors, Egis creates and operates **intelligent infrastructure** and **buildings** capable of responding to the climate emergency and addressing the major challenges of our time by helping to achieve more balanced, sustainable and resilient territorial development.

A **75%-owned subsidiary of Caisse des Depots**, with the **remaining 25% held by partner executives and employees**, Egis places its multiple fields of expertise at the disposal of the community and makes cutting-edge innovation accessible to all projects throughout their lifecycle: consulting, engineering, operation.

Through its wide-ranging fields of activity, Egis is a central player in the **collective organisation of society** and the **living environment of its inhabitants** all over the world.
