In 2017, Eiffage participated in the Green Solutions Awards, an international competition for sustainable solutions organized each year by Construction21. Awarded the French User's choice, Cestas is one of Europe's best-performing photovoltaic plants. For Dena Villanueva, Eiffage Group Sustainable Development and Innovation Officer, the competition highlighted the company's sustainable development approach from design to end-of-life, beyond energy performance. Discover this extraordinary project!

Can you tell us about your career and Eiffage's commitment to renewable energy ?
As an architect, I joined the Eiffage group in 2009 through the Energy division within an in-house research department dedicated to renewable energies; where I specialized in this field and more specifically in photovoltaics (...)
