Energy-intensive building

Building

A

Building Type : Collective housing < 50m

Construction Year : 2017

Delivery year : 2017

Address 1 - street : Ancienne douane, route d'Arlon à Steinfort (L) 8410 STEINFORT, Luxembourg

Climate zone : [Cfb] Marine Mild Winter, warm summer, no dry season.

Net Floor Area : 1 034 m² NGF

Construction/refurbishment cost : 3 267 180 €

Number of Dwelling : 14 Dwelling

Cost/m² : 3159.75 €/m²

Certifications :

General information

This wooden passive residence project is exemplary in terms of both its urban integration and its environmental and energy performance. Indeed, the project must respond appropriately to the challenge of addressing the future residence, an important symbolic issue, not only for the Housing Fund, but also for the municipality of Steinfort. The expression of the building is sober and contemporary, the volumetry integrates harmoniously into the profile of the Arlon road. Most of the building, apartments and roofs are constructed of wood, while the basement and vertical walkways are constructed of concrete. The building is designed to meet the Passive Energy Performance Class (AAA) according to the Grand Ducal Regulations and to obtain the international certification label of the PassivHaus Institute Darmstadt. In summary, the present passive residence project has been developed taking into account all relevant stakeholders and aims to propose a consensual solution in the spirit of sustainable development, social responsibility and respect for the environment.

Technical Engineering

Owner approach of sustainability

- The objective was to conceptualize a sustainable and passive building. - The specificity of the project is that the basement that was built in concrete as well as the common circulations are not in the thermal envelope.

Architectural description

The present passive residence project has therefore been conceived in the spirit of sustainable development, social responsibility and respect for the environment

Energy

Energy consumption

Primary energy need : 35,80 kWh/m².an

Primary energy need for standard building : 45,00 kWh/m².an

Calculation method : RGD du 30 novembre 2007 - bâtiment d'habitation

Renewables & systems

Systems

Heating system :

- Heat pump

Hot water system :

- Heat pump

Cooling system :

- Water chiller

Ventilation system :

- Double flow heat exchanger

Renewable systems :

- Solar Thermal

Products

Product

Wood frame: Brettschichtholz BSH

Schmelter GmbH

Product category : Table

'c21_germany.innov_category' doesn't exist

SELECT one.innov_category AS

current,two.innov_category AS

parentFROM innov_category AS

oneINNER JOIN innov_category AS two ON one.parent_id = two.idWHERE one.state=1AND one.id = '6'

The wooden framework that has been put in place is a durable, ecological and local material. Characteristic: $\lambda = 0.13$ (W / mk), thickness: 24 cm

The workers on the site used to use this type of material. The client has accepted the materials.

Wood fiber insulation: Sto: Weichfaserplatte MO42

Knauf Insulation

oneINNER JOIN innov_category AS two ON one.parent_id = two.idWHERE one.state=1AND

one.id = '9'

The wood fiber insulation that has been put in place is a durable, ecological and local material. Characteristic: $\lambda = 0.042$ (W / mk), thickness: 10 cm

The workers on the site used to use this type of material. The client has accepted the materials.

Costs

Construction and exploitation costs

Total cost of the building : 3 267 180 €

Urban environment

- bus stop - P & R - Gas stations - Bakery - Restaurants -Pharmacie

Land plot area

Land plot area : 1 940,00 m²

Built-up area

Built-up area : 539,00 %

Green space

Green space : 195,00

Parking spaces

18 parking spaces = 1,3 per accommodation

Building Environnemental Quality

Building Environmental Quality

- energy efficiency
- integration in the land
- products and materials
