ATELIERS **REMY**

CONCEPTION MÉTALLIQUE

Maison Administrative Provincial de Namur

Philippe Chevalier Samyn, est un architecte et ingénieur belge.
Son architecture se particularise par une approche holistique, investiguant de nouveaux modes de construction visant une adéquation efficiente entre le matériau, la forme, la fonction et l'énergie nécessaire à la mise en œuvre et au fonctionnement des bâtiments.

Nous le remercions de nous avoir donné la possibilité de réaliser cet ambitieux escalier qui restera une de nos plus belles réalisations.
