

## Green Solution House Bornholm shortlisted for prestigious environmental prize

Brand new conference venue Green Solution House on the most southernly island of Denmark, Bornholm, is in the run up for the prestigious COP 21 Prize 'Green Building Solutions Award 2015'.

Monday, November 9, 2015

Brand new conference venue '[Green Solution House](#)' in Rønne on the island of [Bornholm](#), is in the running for a prestigious European prize focusing on innovative environmental initiatives.

Hence, the international organization [Construction 21](#) has listed Green Solution House as a nominee for winning the prestigious COP 21 Prize '[Green Building Solutions Award 2015](#)' awarded in Paris on 3<sup>rd</sup> December 2015.

Green Solution House is represented in the category "Health and Comfort" that rewards environmentally friendly and sustainable buildings with healthy climate and great comfort.

'We are very pleased with the nomination, which gives Green Solution House a unique opportunity to 'shine' on a European level and hopefully generate more knowledge of and preference for our brand new meeting and conference facilities on an international scale,' says a proud Trine Richter, Director of Green Solution House.

Green Solution House only opened its doors to the public on 23rd April 2015. Built of innovative building materials, and interiors based on recycled materials, they generate energy from waste, purify their own wastewater and much, much more. The impressive conference venue with a maximum capacity of up to 700 persons is located on Denmark's most southern island of Bornholm in the Baltic Sea and reachable in just 35 minutes from [Copenhagen by air](#).
