Owner approach of sustainability

Sustainable development approach by the project owner: The project owner's approach is part of the desire to offer buyers an energy-efficient home, whatever the configuration and position of the apartment in the residence. The materials chosen are of high quality to meet the most stringent durability requirements and avoid any maintenance or premature replacement.

Architectural description

The residence consists of 36 units. The volume is compact, of sober and functional modénature with however a particular attention in the management of the constructive details. The rear part is spread around a wooded area inside an island. The rear apartments are equipped with large exterior balconies and all the elevations benefit from generous bays. The architecture is contemporary and balanced, without artifices.

If you had to do it again?

No doubt about it.

Energy

Energy consumption

Primary energy need : 39,00 kWh_{ep}/m².an

Primary energy need for standard building : 45,00 kWh_{ep}/m².an

Product category : Second œuvre /
Menuiseries extérieures

Exterior joinery with a very high degree of insulation, in aluminium, fitted with triple glazing.

Exterior joinery meets strict passive criteria and provides exceptional acoustic comfort, very useful in an urban environment.

Costs

Urban environment

The project is located in the Bonnevoie district, in a high density urban environment and inconstant mutation. The public transport offer is very rich with in particular the immediate proximity of the station. Local shops and services are varied and numerous.

Land plot area

Land plot area : 1 011,00 m²

Built-up area

Built-up area : 62,00 %

Green space

Green space : 254,00

Parking spaces

34 underground parking spaces, with access by car lift.

CONTEST

Reasons for participating in the competition(s)

1. Passive building
2. Compact design and optimal thermal bridge management
3. Exterior joinery with very high energy efficiency
4. Optimized thermal building envelope
