About Us:

E-Motion Electric is the first Romanian company dedicated 100% to electric transport.

E-Motion Electric Company is primarily a manufacturer of electric vehicle charging stations and provides expertise in choosing the right solution for charging infrastructure for electric transport in Romania.

To complete the portfolio on electric transport activity in Romania, E-Motion Electric became a distributor / importer exclusively on this area A2B electric bicycles and electric cars Mia.

The products and solutions in the charging infrastructure are entirely Romanian accomplishments, that we are proud of.

Through the services and products we offer / sell, we actively participate in reducing harmful emissions in urban environment and change attitudes and educate people in this regard as well.
